2024 - 2030

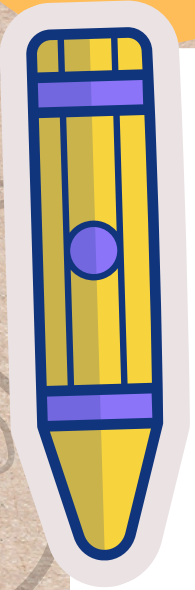

*VISIONING THE FUTURE BY  
TRANSFORMING EDUCATION*

*CHILD FRIENDLY VERSION*

**GOVERNMENT OF MALTA**  
MINISTRY FOR EDUCATION,  
SPORT, YOUTH, RESEARCH  
AND INNOVATION

# INTRODUCTION

The National Education Strategy 2024–2030 is a plan to make the learning and teaching experience better for everyone. The plan focuses on helping people to learn, grow, and be ready for the future.

This plan wants to make sure that everyone, no matter the age, background or situation, gets a good education.

There are three big ideas in this plan:

## WELLBEING

This means feeling happy and safe. Feeling good about yourself is important, and we want everyone in school, including your educators, to feel good about themselves and be happy.

## GROWTH & EMPOWERMENT

This is all about helping you grow and be the best you can be, no matter what you love or want to do!

## EQUITY & INCLUSION

This means everyone gets a fair chance to learn, no matter who they are!

# WELLBEING

The plan wants to make sure that children are not just good at school subjects, but also good at things like understanding their feelings, being safe online, and making friends.

When children feel happy and safe at school, they do better in their schoolwork and become more respectful. As a result, in the future, children will become good citizens who help their community.

So, it is very important for you to be happy at school because it will help you learn new things, be nice to others and participate in your community!

To help with wellbeing, the plan will:

- ◆ Make sure that you have enough time to play and exercise in school.
- ◆ Teach you how to be a good friend and feel good about yourself.
- ◆ Help you with your feelings and mental health.
- ◆ Make sure families and schools work together.
- ◆ Teach you how to be safe and smart on the internet.
- ◆ Teach you how to handle situations when someone tries to hurt you.
- ◆ Change Student Councils to make them more like a team where everyone gets to share their ideas and vote on what is important.

Educators play a very important role in schools. Therefore, this plan also makes sure that they are supported and happy.

Educators help you learn new things every day. They guide you to be the best you can be!

To help with educators' wellbeing, the plan will:

- Make sure that educators are happy.
- Encourage educators to help make decisions on the important stuff, like rules and plans that make school better.
- Make sure to teach everyone about how important educators are.
- Make things easier for educators so they can spend more time teaching fun things!

# GROWTH & EMPOWERMENT

Growth means getting bigger and stronger, learning new things, and having more experiences. Empowerment is when you are given the confidence and tools to do great things and make important decisions in your life.

Educators should get more tools to better understand what children are good at and how they feel. That way, school can help children learn important stuff which they can use in their lives outside of class!

To help with growth and empowerment, the plan will:

- ★ Change what children learn in school to prepare them better for the future.
- ★ Make sure our language and traditions remain important.
- ★ Make sure all children can read and write.
- ★ Help children who might have trouble in school to catch up.
- ★ Have special after-school programmes to help children learn more.
- ★ Make the next step after secondary school better.
- ★ Further, help children who are great at sports or art.
- ★ Build a place where students can learn traditional and future crafts.
- ★ Make sure schools and companies work together to help children learn and find jobs when they grow up.

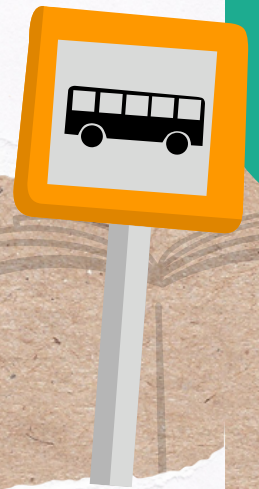

# EQUITY & INCLUSION

Equity and inclusion mean making sure that everyone gets treated fairly and is included in games, activities, and everything else.

This helps us make sure every child gets the help they need to understand how to be fair and get along with friends from different cultures.

To help with equity and inclusion, the plan will:

-  Collect information about children to help make better plans.
-  Make sure children go to school regularly and not miss too much of school.
-  Change the way children who need extra school support are given help.
-  Provide more help to children who have different skills and abilities.
-  Provide grown-ups with better education opportunities to get better at their jobs.
-  Help children coming from other countries to make sure they can continue learning.

# CONCLUSION

This special plan will make a guide for schools, making sure you and your friends feel happy, grow, and have the power to do awesome things. It will help you stay healthy, happy, and be in charge of your future.

The plan cares about educators too. It will make learning better for everyone and gives every student a chance to succeed.
